

Conservation on Tap

6-8 pm

Held at The Pines, Hwy 51, Mercer, WI

2018 Event Calendar

June 12th: Exploring Early Northwood's Conservation Traditions

At the dawn of the 20th century new conservation activism emerged; ranging from grassroots efforts, to state and federal protection. Importantly, early conservation efforts along the Bear, Trout, Turtle and Manitowish Rivers illustrate a broad range of diverse environmental preservation action. Join Historian Jim Bokern, as he talks about our local Conservation Traditions.

July 10th: McDermott Lake Fish Research Project

Effects of centrarchid (bluegill, black crappie, rock bass) removal on walleye recruitment in a northern Wisconsin lake -WDNR and UW fish research team.

August 7th: What's happening to our lakes?

Dr. Noah Lottig: Assistant Scientist and Site Manager with the North Temperate Lakes Long Term Ecological Research. Lake ecology and biophysical setting, climate, and changing land use over time (past, present, future) .

**Sponsored By: Iron County Land & Waters Conservation Department,
The Pines and the Iron County Lakes and River Alliance**
